Innovation ecosystem of Silicon Valley

- key characteristics
 - risk-taking culture, trust in technology
 - easy access to huge capital - VCs, angel investors alike
 - talent density - engineers, entrepreneurs, researchers, scientists
 - diversity, collision density of ideas
 - ecosystem of collaboration and competition
- it matters for global big tech
 - sets trends in AI, software & hardware innovation
 - acts as testing ground for disruptive ideas

Case study: Amazon - amazing differentiators of big techs

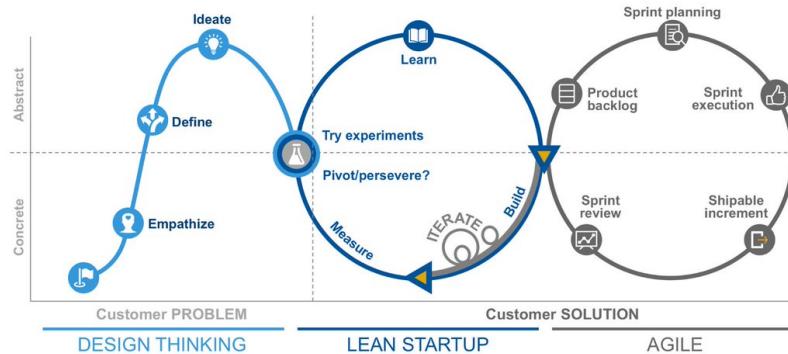

- Amazon's culture & leadership principles
 - customer obsession as driver of innovation
 - high standards & ownership culture
 - bias for action and long-term thinking - sounds contradictory?
 - mechanisms like “two-pizza teams” & “Day One” for scalability
- lessons for Samsung
 - applying customer-centric innovation in hardware & AI, e.g., on-device AI
 - balancing agility with long-term R&D
 - *build / adapt / apply on the core strength of Samsung that no other company has!*

Founding and scaling startups

- challenges
 - competence of and chemistry among co-founders crucial
 - technology and world-class team is *absolute necessary*, but *not sufficient* for success
 - business models, market fit, timing, agility, flexibility for pivoting and perseverance
- insight
 - importance of domain expertise in addition to AI
 - balancing innovation with good business decisions

Combine Design Thinking, Lean Startup and Agile

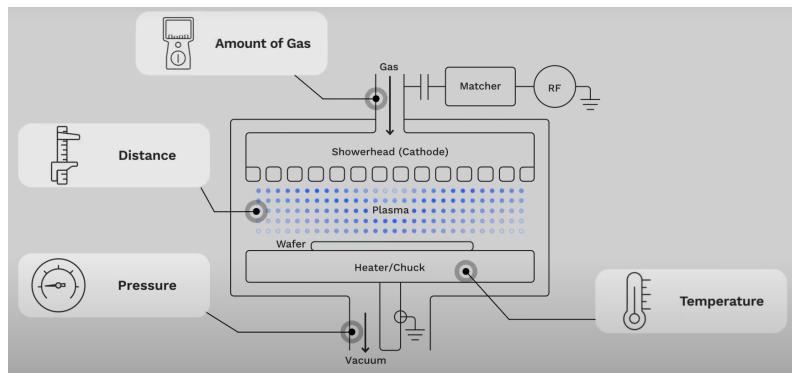

Product-Market Fit (PMF)

AI in shaping future of semiconductor and beyond

- opportunities
 - computer vision applications, *e.g.*, defect inspection, automatic measurement, (wafer failure) pattern classification
 - AI-driven optimization in manufacturing, quality control
- challenges
 - data quality, accessibility, *e.g.*, integration with legacy systems
 - demand for extreme accuracy, concept drift & shift
- *bad* examples
 - predictive maintenance - extremely hard (or impossible) problem

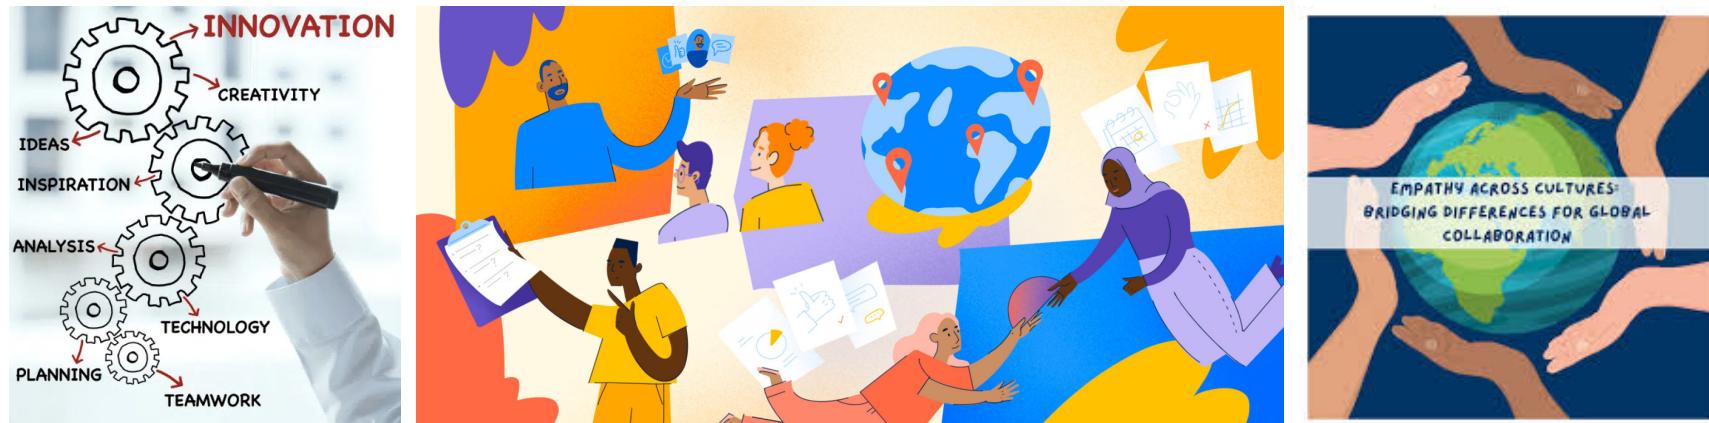

Bridging Silicon Valley & Korea

- cultural differences
 - risk appetite & failure tolerance
 - decision-making speed and hierarchy
 - innovation vs execution focus
- opportunities for collaboration
 - leveraging Korea's manufacturing expertise with Silicon Valley's software/AI strengths
 - building global teams with diverse perspectives

Closing thoughts

- embrace a customer-centric mindset in innovation and for business decisions
- balance agility with long-term vision
- foster cross-cultural collaboration for global impact
- leverage AI to solve real-world industrial challenges
