SUMMARY

I am a Silicon Valley-based AI technologist, entrepreneur, and ecosystem leader whose career spans the full arc of the AI value chain — from semiconductor design and manufacturing, through hyperscale AI development and productionization in e-commerce, to AI-driven biotechnology. I am Co-Founder & CTO @ [Erudio Bio, Inc.](#), CA, USA, a Stanford spin-out AI biotech company, Co-Founder & CEO @ [Erudio Bio Korea, Inc.](#), and Co-Founder & Chair of [Silicon Valley AI Nexus \(AI Nexus\)](#), a Silicon Valley-based nonprofit community connecting AI founders, researchers, investors, and policymakers. I also serve as an advisor to Korean American Semiconductor Professional Alliance (KASPA), USA, a KFAS-Salzburg Global Leadership Initiative Fellow @ Salzburg Global Seminar, Salzburg, Austria, a Visiting Professor @ Sogang University, Seoul, South Korea, an Advisory Professor @ Daegu Gyeongbuk Institute of Science & Technology (DGIST), South Korea, and a Global Advisory Board Member @ Innovative Future Brain-Inspired Intelligence System Semiconductor of Sogang University.

Before founding the new AI biotech company, I co-founded Gauss Labs, Inc., an industrial AI company, built and ran the US Headquarters of Gauss Labs, and spearheaded research & development of the core technology & products. Before Gauss Labs, I drove various AI technology and product developments @ Amazon.com, Inc. where one of the projects created a 200 million USD revenue increase via the Amazon Mobile Shopping App.

I specialize in Artificial Intelligence (AI) and Convex Optimization, having led cutting-edge projects across semiconductor design, strategic marketing and market intelligence, e-commerce, industrial AI, and biotech. My current focus is on AI agents built on recent breakthroughs in large language models (LLMs) and multimodal generative AI (genAI) — driving business innovation, anticipating industry trajectories, and assessing their broad impacts on society, economy, and policy.
